

The new small lower part for screwing

Our new small lower part for screwing is currently available in 5 surfaces.

The new small lower part is available with the following stainless steel screws:

- M 2,5 x 6 mm for a clamping area of 0-4 mm
- M 2,5 x 8 mm for a clamping area of 2-6 mm

The flat washers (Ø 8 mm, stainless steel) are included in the scope of supply.

The installation is very easy

1. Slip the flat washer onto the screw:

2. Insert the screw through the hole (Ø 2mm) and screw the ball head onto it.

Make sure that the slotted screw is tightened:
